Education

Boston University, Boston, MA

Class of 2026

Master of Science in Computer Science, Dean's List

Bachelor of Arts in Computer Science | Minor: Business Administration & Management

Work Experience

InBite (startup), Boston, MA

May 2025 – July 2025

Software Engineering Intern

- Engineered scalable backend APIs in Node.js, Express, PostgreSQL for a real-time meal-matching platform, powering multi-campus session hosting and cutting average request latency by 25%.
- Developed dynamic React + Next.js frontends with WebSockets, allowing users to instantly discover and join nearby dining sessions, boosting engagement by 30% during pilot launch.

Achillea Peer Tutoring, Remote - New York City, NY

June 2023 – September 2023

Database Management Intern

- Optimized and deployed a PostgreSQL database on AWS with automated failover and backup pipelines, cutting query runtime by 35% and improving scalability and analytics integration for a 5,000+ record tutoring platform.

Ernst & Young, Ho Chi Minh City, VN

May 2023 – July 2023

Tech Consulting Intern

- Built a machine learning churn prediction model using Azure and Python for 400K+ BIDV bank customers, achieving 92% prediction accuracy and reducing projected customer attrition by 15%.
- Established CI/CD pipelines in Azure DevOps to automate model retraining and deployment, streamlining releases, ensuring production scalability, and cutting manual workload by 30%.

Projects

Boston Public Library, Boston, MA

September 2025 – December 2025

Applied Machine Learning Engineer

- Built LLM-powered retrieval-augmented search across 1.2M+ digital archives, improving retrieval relevance by 40% using LangChain and pgvector.
- Deployed an end-to-end ML pipeline on Hugging Face Spaces, achieving 3–5s query latency and cutting infrastructure costs by 80% through migration from Pinecone to PostgreSQL.

Wallet Wrapped, Boston, MA

October 2025

Full-Stack Developer | BostonHacks 2025

- Created a Next.js, TypeScript, MongoDB financial analytics app integrating Gemini AI + Nessie API, delivering personalized insights with 40% higher engagement and secure real-time goal tracking.

All In, Boston, MA

June 2024 – March 2025

Founder & Full Stack Developer

- Built a web app using React.js + Firebase allowing students to discover, host and join campus poker games with real-time player tracking via Firestore listeners.
- Increased user engagement by 30% and session retention by 25% through dynamic invitation systems.

Phanes Masks (Incubated by Supreme Incubator), Ho Chi Minh City, VN

March 2020 – August 2022

Founder & CEO

- Led a 36-member global team to scale an eco-friendly mask startup, achieving a 318% profit increase, 7K+ units sold, and preventing disposal of ~917K single-use masks through sustainable production.

Skills

Technical: Python, Java, C/C++, JavaScript, TypeScript, SQL, React, Next.js, Node.js, Express, Tailwind CSS

Databases, Cloud & Tools: MongoDB, PostgreSQL, Firebase, AWS, Git, REST APIs

Interests: Combat sports, Game theory, Strength training

Languages: English (native), Hindi (native), Spanish (basic)
